DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a dual band antenna comprising a support substrate with a grounding conductor, a first radiating conductor plate arranged substantially parallel to the ground conductor, a power supplying conductor plate extending downwards from the first radiating conductor plate and adapted to be supplied a first frequency at a bottom portion of the power supplying conductor plate, a connecting conductor plate for connecting the first radiating conductor plate to the ground conductor, and a second radiating conductor plate provided upright with respect to the grounding conductor, facing the underside of the first radiating conductor plate at a top portion and adapted to be supplied at bottom portion with a second frequency that is higher than the first frequency, wherein the second radiating conductor plate is constructed that a gap between the top portion of the second radiating conductor plate and the first radiating conductor plate can be changed.

None of the prior arts shows or suggests this dual band antenna.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
